### Jurisdiction Profile

The following is a summary of key information about the jurisdiction and its history:

- Date of Incorporation: Des Plaines was incorporated in 1869
- Current Population: The US Census 2018 estimate for Des Plaines was 36,240.
- Population Growth: Between 2010 and 2018, the population of Des Plaines remained relatively stable. However, by the year 2021, the City anticipates an increase or about 10,000 residents.
   New condominium and housing developments are currently being constructed and will drive this population growth.
- Location and Description: The City of Des Plaines is located in Cook County, approximately 19
  miles northwest of downtown Chicago. Neighboring communities include Mount Prospect, Park
  Ridge, Elk Grove Village, and Chicago, as well as unincorporated lands to the northeast in Maine
  Township and the southwest in Elk Grove Township. Des Plaines shares its southern border with
  O'Hare International Airport.
- History: The Des Plaines area was occupied by Potawatomi, Ottawa, and Chippewa Indians until the Treaty of Chicago in 1833. It was then settled by farmers from New England, New York, and Germany. The settlers found a very flat area that had been leveled by several glaciers in eons past. The main topographical features were flat, wet, prairie and the Des Plaines River. Because of the flat terrain and water loving prairie grasses, much of the rain that fell on the area stayed there. The river was more of a wide grassy swale, not the deeper cut channel seen today. To farm and build houses, the land had to be drained artificially with manmade ditches. The present site of Des Plaines was determined by early settler Socrates Rand who built a grist mill on the Des Plaines River. In the 1850's, the railroad came through, connecting Chicago to central Wisconsin. Trains would stop near the mill to take on water. The Chicago and North Western Railroad, named its station "Des Plaines." In 1869, the Village of Des Plaines was incorporated. In 1870, the federal census noted that the Village had 800 residents. The town grew as a farming and railroad community until the mid 20th Century when it became more and more tied to Chicago as a suburb. In 1925, a referendum passed to adopt the city form of government. In the 50 years from 1940 to 1990, the population increased from 9,000 to over 50,000. Industry and business grew, too, giving the City a diversified economy. While the railroad is still central to Des Plaines, the City is served by two Interstate highways and is adjacent to O'Hare International Airport.
- Climate: The City of Des Plaines experiences a continental climate characterized by warm summers as well as cold and dry winters. Summer months have an average temperature of 72 degrees Fahrenheit, which tends to peak in July with average daily high temperatures of 84 degrees Fahrenheit. Winter months have an average temperature of 26 degrees Fahrenheit and typically drop significantly in January, when daily low temperatures average 16.5 degrees Fahrenheit. The City receives an average of 37 inches of rain and 37 inches of snowfall per year.
   Spring and summer months (May through August) tend to experience the most accumulated rainfall.
- Governing Body Format: The City of Des Plaines is a home rule municipality with a managerial form of government. Flood and other natural hazard issues are addressed by the City's Incident Management Team (Mayor, City Manager, and all department heads) and the Emergency Management Coordinator. The City's Emergency Management Program in one of five Illinois

Emergency Management Agency (IEMA)- accredited emergency management agencies in Cook County.

- Development Trends: Des Plaines participates in the Federal Emergency Management Agency's (FEMA) National Flood Insurance Program and the Community Rating System (CRS). The City regulates all development within the Special Flood Hazard Area (SFHA). The City is within the corporate limits of the Metropolitan Water Reclamation District of Greater Chicago (MWRD). The MWRD is responsible for wastewater treatment, and also has the authority to regulate development that impacts storm water within Cook County.
- Retail and Commercial Activity: The City of Des Plaines has seen considerable housing and
  commercial redevelopment over the past 10 years. The City's major downtown redevelopment
  project, Metropolitan Square, was fully built and reached full tax valuation in 2008. This mixeduse redevelopment features 142 condominium/loft residences; 114,000 square feet of retail
  space; another 27,000 square feet of office space; a 471-car public parking garage, and civic
  streetscape improvements.

There are currently over \$650 million in projects going on in Des Plaines. These projects include the following; 113 luxury apartment development adjacent to the Downtown Des Plaines Metra Station Platform, the southeast corner of Ellinwood Street and Graceland Avenue will experience a redevelopment renaissance with a brand-new, luxury mixed-use development, Lexington Homes is adding 58 new townhomes in downtown Des Plaines, and a 236-unit apartment community is currently under construction at the northwest corner of Golf Road and East River Road which is immediately west of I-294. Additionally, Wheels Inc., the world's largest vehicle fleet management company, announced a major renovation and expansion of their sprawling 18-acre campus that is abutting the Des Plaines River. The intersection of Mount Prospect Road and Algonquin Road will see a major transformation as Vetter Pharma purchased the 18-acre property that encompassed the Salvation Army. Also, the property that formerly housed Hart Schaffner Marx will now encompass a \$75,000,000 data center facility and a new Fairfield Inn and Suites by Marriott will complement the existing Wyndham Hotel and Longhorn Steakhouse at the northwest corner of Touhy Ave and Mannheim Road.

• Industrial Activity: The ongoing expansion of Chicago O'Hare International Airport and its siting of the new air cargo terminal adjacent to the City of Des Plaines have fostered a major air freight industry cluster within the industrial quadrant of the City of Des Plaines. Integrated freight forwarding companies, Forward Air, DB Schenker, and Nippon Express have completed terminals within the City of Des Plaines, and the City's TIF District No. 3 is 100% built out with the development of facilities for Hellman, Coasters, Caterpillar Logistics and Bombardier companies. An additional site for air freight development has been acquired and cleared by International Airport Centers.

The City Council supported the issuance of three Cook County 6B property tax classifications to attract new investments in its manufacturing sector. Two of the three businesses will substantially rehabilitate its' newly acquired buildings and provide approximately 45 new jobs.

Of note, Charles Equipment Energy Systems anticipates generating approximately \$10,000 to \$50,000 in sales tax annually. The third 6B applicant will construct a brand new \$6.83 million state-of-the art LEED certified structure in the center of 21 neighboring manufacturing buildings. Its location was heavily influenced based on its proximity to the forthcoming \$200 million Chicago O'Hare International Airport Northeast Cargo Center project.

• Entertainment: The 10th and final Illinois gaming license was issued based upon the City of Des Plaines' agreement with Midwest Gaming and Entertainment for a 1,200-seat casino, parking structure, hotel, and restaurant complex on a 20-plus acre site in the far southeast corner of the City. Since Rivers Casino opened in July 2011, it has had the highest adjusted gross receipts of any casino in the State (averaging over \$30,000,000 per month) since opening. The City has a tax revenue sharing agreement in place with Midwest Gaming in which \$10,000,000 of the gaming tax revenues generated from the Casino are sent to the State of Illinois and 40% of the remaining revenues are shared with 10 distressed communities named in the original agreement. Further redevelopment of adjacent commercial properties is anticipated as well. The Casino is one of the City's newest principal employers with nearly 1,400 positions. Additional community benefits include an October 2013 donation of \$150,000 to the Des Plaines Oakton Community College campus for scholarships.

## Capability Assessment

The assessment of the jurisdiction's legal and regulatory capabilities is presented in the *Legal and Regulatory Capability Table* below. The assessment of the jurisdiction's fiscal capabilities is presented in the *Fiscal Capability Table* below. The assessment of the jurisdiction's administrative and technical capabilities is presented in the *Administrative and Technical Capability Table* below. Information on the community's National Flood Insurance Program (NFIP) compliance is presented in the *National Flood Insurance Program Compliance Table* below. Classifications under various community mitigation programs are presented in the *Community Classifications Table* below.

TABLE: NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

What department is responsible for floodplain management in your jurisdiction?	Engineering
Who is your jurisdiction's floodplain administrator? (department/position)	Engineering/Assistant Director
Are any certified floodplain managers on staff in your jurisdiction?	Yes
What is the date of adoption of your flood damage prevention ordinance?	2015
When was the most recent Community Assistance Visit or Community Assistance Contact?	July 2014
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, please state what they are.	No
Do your flood hazard maps adequately address the flood risk within your jurisdiction? (If no, please state why)	Yes
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	No
Does your jurisdiction participate in the Community Rating System (CRS)? If so, is your jurisdiction seeking to improve its CRS Classification? If not, is your jurisdiction interested in joining the CRS program?	Yes

### Jurisdiction-Specific Natural Hazard Event

The information provided below was solicited from the jurisdiction and supported by NOAA and other relevant data sources.

The Natural Hazard Events Table lists all past occurrences of natural hazards within the jurisdiction.

- Repetitive flood loss records are as follows: Number of FEMA-Identified Repetitive Loss Properties: 245 (10 institutional, 10 commercial, 225 residential)
- Number of FEMA-Identified Severe Repetitive Loss Properties: 0
- Number of Repetitive Flood Loss/Severe Repetitive Loss Properties That Have Been Mitigated: 2 (residential)

TABLE: NATURAL HAZARD EVENTS

### **Jurisdiction-Specific Hazards and Impacts**

Hazards that represent a county-wide risk are addressed in the Risk Assessment section of the 2019 Cook County Multi-Jurisdictional Hazard Mitigation Plan Update. This section only addresses the hazards and their associated impacts that are **relevant** and **unique** to the municipality.

**Flood:** The City of Des Plaines has experienced flooding in the following areas: Des Plaines River, Weller Creek, Big Bend & River/Oakton Area. We are currently participating in the FEMA Buy-Out program to mitigate the risk of flooding.

Extreme Cold: Senior citizens are particularly vulnerable to extreme cold.

*Wind, Hail, and Thunderstorms:* Cause significant property and tree damage. While no tornados have previously touched down, high wind and thunderstorms conditions are problematic for the area.

Earthquake: While no fault zones are in the County, Des Plaines Crater fault activity has been reported

# Hazard Risk Ranking

The *Hazard Risk Ranking Table* below presents the ranking of the hazards of concern. Hazard area extent and location maps are included at the end of this chapter. These maps are based on the best available data at the time of the preparation of this plan, and are considered to be adequate for planning purposes.

TABLE:	TABLE: HAZARD RISK RANKING				
Rank	Hazard Type Risk Rating Score (Probability x Impact)				
1	Flood	54			
2	Severe Weather	54			
3	Severe Winter Weather	50			
4	Tornado	32			
5	Dam Failure	8			
6	Drought	2			
7	Earthquake	0			

### Mitigation Strategies and Actions

subdivision, floodplain, and stormwater

management ordinances.

The heart of the mitigation plan is the mitigation strategy, which serves as the long-term blueprint for reducing the potential losses identified in the risk assessment. The mitigation strategy describes how the community will accomplish the overall purpose, or mission, of the planning process. In this section, mitigation actions/projects were updated/amended, identified, evaluated, and prioritized. This section is organized as follows:

- New Mitigation Actions New actions identified during this 2019 update process
- Ongoing Mitigation Actions Ongoing actions with no definitive end or that are still in progress.
   During the 2019 update, these "ongoing" mitigation actions and projects were modified and/or amended, as needed.
- Completed Mitigation Actions An archive of all identified and completed projects, including completed actions since 2014.

The Hazard Mitigation Action Plan Matrix Table below lists the actions that make up the jurisdiction's hazard mitigation plan. The Mitigation Strategy Priority Schedule Table identifies the priority for each action.

# **New Mitigation Actions**

The following are new mitigation actions created during the 2019 update.

Mitigation Action	Implement Des Plaines Flood-Prone Property Acquisitions (Phase I)
Year Initiated	2019
Applicable Jurisdiction	Des Plaines
Lead	MWRD
Agency/Organization	
Supporting	
Agencies/Organizations	
Applicable Goal	Develop and implement sustainable, cost-effective, and environmentally sound
	risk-reduction (mitigation) projects.
Applicable Objective	Provide or improve flood protection on a watershed basis with flood control
	structures and drainage maintenance plans.
Potential Funding	Grants
Source	
Estimated Cost	\$3,949,639; MWRD Contribution: \$949,829
Benefits (loss avoided)	Reduce exposure to flooding
Projected Completion	Long Term
Date	
Priority and Level of	
Importance (Low,	High
Medium, High)	
Benefit Analysis (Low,	High
Medium, High)	
Cost Analysis (Low,	High
Medium, High)	
Actual Completion	TBD
Date	

Recommended Mitigati	on Action/Implementation Plan and Project Description
Action/Implementation	ID: Des Plaines FPPA Contract: 15-IGA-18 Watershed: Lower Des Plaines
Plan and Project	Location: Des Plaines, IL
Description:	
	Provided local sponsor assistance for Illinois Emergency Management Agency
	grant project to acquire 13 properties in the Big Bend neighborhood along the
	Des Plaines River
